Deployment of funds collected during NFO period

The AMC shall deploy the funds garnered in an NFO within 30 business days from the date of allotment of units. In an exceptional case, if the AMC is not able to deploy the funds in 30 business days, reasons in writing, including details of efforts taken to deploy the funds, shall be placed before the Investment Committee of the AMC. Basis root cause analysis, The Investment Committee may extend the timeline by 30 business days, while also making recommendations on how to ensure deployment within 30 business days going forward and monitoring the same. Trustees shall also need to monitor the deployment of funds collected in NFO and take steps, as may be required, to ensure that the funds are deployed within a reasonable timeframe.

In case the funds are not deployed as per the asset allocation mentioned in the SID as per the aforesaid mandated plus extended timelines, AMC shall:

- not be permitted to receive fresh flows in the same scheme till the time the funds are deployed as per the asset allocation mentioned in the SID.
- not be permitted to levy exit load, if any, on the investors exiting such scheme(s) after 60 business days of not complying with the asset allocation of the scheme.
- inform all investors of the NFO, about the option of an exit from the concerned scheme without exit load, via email, SMS or other similar mode of communication.
- report deviation, if any, to Trustees at each of the above stages.

Rebalancing due to Short Term Defensive Considerations:

As per Para 1.14.1.2 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the asset allocation pattern indicated above may change for a short-term period on defensive considerations. The proportion of the scheme invested in each type of security will vary in accordance with microeconomic & macroeconomic conditions, interest rates, and other relevant considerations. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. In case of any deviation, the portfolio shall be rebalanced within 30 calendar days.

Rebalancing due to passive breaches

In the event of any deviations from the mandated asset allocation as mentioned above due to passive breaches, portfolio rebalancing will be carried out by the Fund Manager within 30 Business Days of the date of the said deviation. In case the rebalancing is not done within the specified period of 30 Business Days, the matter would be recorded in writing and shall be placed before the Investment Committee.

The Investment Committee shall record the reason in writing leading the reason for falling the exposure outside the asset allocation and if so desires, the Committee shall extend the timelines upto 60 (sixty) Business Days from the date of completion of mandated rebalancing period of 30 Business Days in line with Clause 2.9 of the SEBI Master Circular dated June 27, 2024.

	<p>Further, in case, the portfolio of schemes is not rebalanced within the aforementioned both the timelines, the AMC shall:</p> <ol style="list-style-type: none"> Not launch any new scheme till the time the portfolio is rebalanced. Not levy exit load, if any, on the investor exiting the scheme. <p>In case the AUM of the deviated portfolio is more than 10% of the AUM of the main portfolio of the scheme.</p> <ol style="list-style-type: none"> The AMC shall immediately communicate the same to the investors of the scheme after the expiry of the mandated rebalancing period (i.e. 30 Business Days) through SMS and email/ letter including details of portfolio not rebalanced. The AMC shall also immediately communicate to the investors through SMS and email/letter when the portfolio is rebalanced. The AMC shall disclose scheme wise deviation of the portfolio (beyond aforesaid 10% limit) from the mandated asset allocation beyond 30 business days, on the AMC 's website i.e. www.unifimf.com. <p>The AMC shall also disclose any deviation from the mandated asset allocation to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines.</p>
Investment Strategy	<p>The strategy is to deliver the stated investment objective with an intent to provide reasonable returns consistent with low to moderate levels of risk and a high level of liquidity through investments made in money market and debt securities with maturity of up to 91 days.</p> <p>The endeavour will be to manage the scheme liquidity actively in line with overall macroeconomic and debt market scenario along with understanding of possible inflows and outflows from the Scheme.</p> <p>Investment views/ decisions will consider parameters like prevailing interest rate scenario, quality of the security/ instrument, maturity profile of the instrument, liquidity of the security, growth prospects of the company/ industry, and other factors which is important in the opinion of the fund management team.</p> <p>The scheme may invest in fixed income derivatives. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or excuse such strategies.</p> <p>The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.</p> <p>Portfolio Turnover: The scheme being an open-ended scheme, it is expected that there would be frequent subscriptions and redemptions. Hence, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. If trading is done frequently there may be an increase in transaction cost such as brokerage paid etc. The fund manager shall endeavour to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. The Scheme has no specific target relating to portfolio turnover.</p>
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID/SAI carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p>Risks associated with investments in Fixed Income Securities</p> <p>Interest-Rate Risk: Fixed income securities such as government bonds, corporate bonds, money market instruments and derivatives run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase.</p> <p>The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.</p> <p>Re-investment Risk: Investments in fixed income securities carry re-investment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.</p> <p>Basis Risk: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.</p> <p>Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio.</p>

The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Liquidity Risk: The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Schemes' investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Credit Risk: This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Settlement Risk: Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Risks associated with investments in Derivatives

The scheme may use various derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the underlying instrument but also of the derivative itself. Other risks include the risk of mis-pricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

The scheme may use derivatives instruments for the purpose of hedging and portfolio balancing, as permitted under the Regulations and guidelines. Usage of derivatives will expose the scheme to certain risks inherent to such derivatives.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. Derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value.

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments. The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:

- Lack of opportunity available in the market.
- **Valuation Risk:** The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- **Execution Risk:** The prices which are seen on the screen need not be the same at which execution will take place.
- **Basis Risk:** This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying asset being hedged.
- Stock Exchanges could increase the initial margin, variation margin or other forms of margin on derivative contracts, impose one sided margins or insist that margins be placed in cash. All of these might force positions to be unwound at a loss and might materially impact returns.
- **Operational / Systemic Risk:** This is the risk arising due to failure of operational processes followed by the exchanges and Over The Counter (OTC) participants for the derivatives trading.
- **Exposure Risk:** An exposure to derivatives in excess of the hedging requirements can lead to losses. An exposure to derivatives can also limit the profits from a plain investment transaction.
- **Implied Volatility:** The estimated volatility of an underlying security's price and derivatives price.

- **Systemic Risk:** The risk inherent in the capital market due to macro-economic factors like Inflation, GDP, Global events.

- **Counterparty Risk:** Counterparty risk is the risk that losses will be incurred due to the default by the counterparty for OTC derivatives.

- **Credit Risk:** The Credit Risk is the risk that the counter party will default in its obligations and is generally small as in a derivative transaction there is generally no exchange of the principal amount.

The following are certain additional risks involved with use of fixed income derivatives:

Interest rate risk:

Derivatives carry the risk of adverse changes in the price due to change in interest rates.

Liquidity risk: During the life of the derivative, the benchmark might become illiquid and might not be fully capturing the interest rate changes in the market, or the selling, unwinding prices might not reflect the underlying assets, rates and indices, leading to loss of value of the portfolio.

Risks associated with Repo transactions in Corporate Bonds

The Scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo transactions, the collateral may be sold and a loss is realized only if the sale price is less than the repo amount. The risk is further mitigated through over-collateralization (the value of the collateral being more than the repo amount).

Risks associated with segregated portfolio

1. Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.

2. Security comprises of segregated portfolio may not realise any value.

3. Listing of units of segregated portfolio on recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risks associated with Securities Lending

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

Risks associated with investment in units of mutual fund

Investment in Mutual Fund Units involves investment risks, including but not limited to risks such as liquidity risk, volatility risk, default risk including the possible loss of principal.

- **Liquidity risk** – The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the right to limit redemptions will be in accordance with SEBI mandated process.

- **Volatility risk:** There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors.

- **Default risk** – Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

Risk associated with Backstop facility in the form of investment in Corporate Debt Market Development Fund('CDMDF'):

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with Clause 16A.2 of SEBI Master Circular dated June 27, 2024 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, specified schemes shall need to invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, Investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Risks associated with investment in unlisted securities:

Except for any security of an associate or group company, the scheme can invest in securities which are not listed on a stock exchange ("unlisted Securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted debt securities may lack a liquid secondary market and there can be no assurance that the Scheme will realise their investments in unlisted securities at a fair value.

Risk associated with Interest Rate Future (IRF):

An Interest Rate Futures is an agreement to buy or sell a debt instruments at a specified future date at a price that is fixed today. Interest Rate Futures are Exchange Traded and are cash settled. Hedging using Interest Rate Futures can be perfect or imperfect. Perfect hedging means hedging the underlying using IRF contract of same underlying.

- a) Market risk: Derivatives carry the risk of adverse changes in the market price.
- b) Price Risk- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- c) Liquidity risk – This occurs where the derivatives cannot be sold (unwound) at prices that reflect the underlying assets, rates and indices.
- d) Model Risk – The risk of mispricing or improper valuation of derivatives.
- e) Basis Risk – This risk arises when the instrument used as a hedge does not match the movement in the instrument/ underlying asset being hedged. The risks may be inter-related also; for e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets. Correlation weakening and consequent risk of regulatory breach: SEBI Regulations mandates minimum correlation criterion of 0.9 (calculated on a 90-day basis) between the portfolio being hedged and the derivative instrument used for hedging. In cases where the correlation falls below 0.9, a rebalancing period of 5 working days has been permitted. Inability to satisfy this requirement to restore the correlation level to the stipulated level, within the stipulated period, due to difficulties in rebalancing would lead to a lapse of the exemption in gross exposure computation. The entire derivative exposure would then need to be included in gross exposure, which may result in gross exposure in excess of 100% of net asset value.

Risk factors associated with investment in Tri-Party Repo:

The mutual fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund

contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Performance Risk:

Performance risk refers to the risk of a scheme being unable to generate returns matching / above the returns of the scheme's benchmark. It would also mean the scheme underperforming against its peer set of other mutual fund schemes having similar portfolios, scheme classification, objective, benchmark and asset allocation. These risks could arise due to a variety of market and economic activities, government policies, global economic changes, currency fluctuations, tax policies, political changes, corporate actions and investors' behaviour.

C. Risk mitigation strategies:

Type of Instruments	Mitigation Measures
Debt and Money Market instruments	<p>Interest Rate Risk: The scheme would typically invests in money market instruments and securities with a maturity of less than 91 days hence portfolio volatility on account of interest rate risk is minimal. The scheme may take positions in interest rate derivatives to hedge market/interest rate risks.</p> <p>Credit risk or default risk: The Fund will endeavour to minimise Credit/Default risk by primarily investing in investment grade fixed income securities rated by SEBI registered credit rating agencies. Investments will be made in instruments with sovereign rating, AAA, AA and equivalent short-term ratings. These securities carry relatively lower possibility of a default.</p> <p>Reinvestment Risk: Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.</p> <p>Liquidity or Marketability Risk: The very nature of the scheme is such that it is subject to liquidity risk. To manage liquidity, sufficient investments are made in overnight assets to ensure daily liquidity.</p> <p>With the implementation of SEBI circular on Liquidity Risk Management, scheme need to hold adequate liquid assets in the form of LR-RaR and LR-CRaR, on a daily basis, which would help manage liquidity and take care of redemption pressures.</p>
Derivatives	<p>The Scheme may invest in Fixed income derivative for the purpose of hedging, portfolio balancing and other purposes as may be permitted under the Regulations.</p> <p>Derivatives can be either exchange traded or can be over the counter (OTC). Exposure with respect to derivatives shall be in line with regulatory limits and the limits specified in the SID.</p>
Securities Lending	<p>The SLB shall be operated through Clearing Corporation/Clearing House of stock exchanges having nation-wide terminals who are registered as Approved Intermediaries (AIs). The risk is adequately covered as Securities Lending & Borrowing (SLB) is an Exchange traded product. Exchange offers an anonymous trading platform and gives the players the advantage of settlement guarantee without the worries of counter party default. The fund manager will endeavor to recall the securities in case lent securities are to be sold</p>
Repo Transactions	<p>The choice of counterparties is largely restricted and their credit rating is taken into account before entering into such transactions. In the event the counterparty is unable to pay back the money to the scheme as contracted on maturity, the scheme may dispose of the assets (as</p>

	they have sufficient margin) and the net proceeds may be refunded to the counterparty.
Unlisted NCD's	The scheme may invest in Unlisted NCDs as permitted under the Regulation.
Government securities and Triparty repo on Government securities or treasury bills:	As a member of securities segment and Triparty repo segment, maintenance of sufficient margin is a mandatory requirement. CCIL monitors these on a real time basis and requests the participants to provide sufficient margin to enable the trades etc. Also there are stringent conditions / requirements before registering any participants by CCIL in these segments. Since settlement is guaranteed the loss on this account could be minimal though there could be an opportunity loss.
Units of mutual fund schemes	Mutual Fund portfolios are generally well diversified and typically endeavor to provide liquidity on a T+1/T+2 basis.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Stress Testing

As a part of risk management framework, Mutual Funds (MFs) carry out stress testing of their portfolio, particularly for debt schemes. In order to standardize this practice across industry, AMFI came out with Best Practice Guidelines dated September 12, 2014 on stress testing of Liquid Funds and Money Market Mutual Fund Schemes (MMMFs). As per AMFI Best Practice Guidelines Circular No. 103/2022-23 dated October 12, 2022 and subsequent circulars on stress testing, a common methodology has been prescribed across the industry with a common outcome (i.e impact on NAV) as a result of the stress testing carried out by AMC's.

As a part of the extant risk management framework, AMCs will carry out stress testing on the following risk parameters, among others deemed necessary by the AMC:

- a) Interest rate risk; b) Credit risk; c) Liquidity & Redemption risk.

The stress test analysis report will be presented to the Investment Committee for its review pursuant to the conduct of the stress tests. Any breach of the thresholds (of either AMFI or AMC) shall be given a cure period of 15 days. The IC may allow a further cure of upto 30 days basis a written justification. If the breach of threshold continues beyond the cure period, then it will be reported to the Board of AMC and Trustees explaining the reasons for the continued breaches and the corrective action plan(s) taken in this regard. Further, in the event of stress test revealing any vulnerability or early warning signal, it would be required to bring it to the notice of the Trustees and take corrective action as deemed necessary. The AMC will conduct periodic stress testing and shall ensure reporting to the Board of Directors and SEBI/AMFI.

Plans/Options

The Scheme offers two plans:

- a) Direct Plan
b) Regular Plan

Each of the Plans offer the following option:

- a) Growth Option

The default plan is "Direct Plan", in case the broker code is not stated on the application.

Application with broker code will be processed under Regular plan only.

Default scenarios available to the Investors under the Plans of the Scheme:

Scenario	Broker Code mentioned by the Investor	Plan mentioned by the Investor	Default Plan to be captured
1	Not Mentioned	Not Mentioned	Direct Plan
2	Not Mentioned	Direct Plan	Direct Plan
3	Not Mentioned	Regular Plan	Direct Plan

4	Mentioned	Direct Plan	Direct Plan
5	Direct Plan	Not Mentioned	Direct Plan
6	Direct Plan	Regular Plan	Direct Plan
7	Mentioned	Regular Plan	Regular Plan
8	Mentioned	Not Mentioned	Regular Plan

In cases of wrong / incomplete ARN codes mentioned on the application form, the application shall be processed under Direct Plan. The AMC shall endeavour on best effort basis to obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor. In case the correct code is received within 30 calendar days, the AMC shall reprocess the transaction under Regular Plan from the date of application without any exit load.

Treatment of Transactions received with invalid ARNs in view of AMFI Best Practices Guidelines Circular No.111 /2023-24 dated Feb 02, 2024:

Guidelines for Processing of transactions received under Regular Plan with invalid ARN

Transactions received in Regular Plan with Invalid ARN to be processed in Direct Plan of the same Scheme (even if reported in Regular Plan), applying the below logic:

Transaction Type	Primary ARN			Sub Distributor ARN		EUIN*	Execution only mentioned	Regular Plan/ Direct Plan
	Valid	Invalid	Empaneled	Valid	Invalid	Valid	Yes	
Lumpsum/ Registration	Y		Y				Y	Regular
	Y		N	Not Applicable				Direct
	Y		Y	N. A	N. A	N. A	N	Regular*
	Y		Y	Y		Y		Regular
		Y						Direct
	Y		Y	Y			Y	Regular
	Y		Y		Y			Direct
Trigger	Y			Not Applicable				Regular
				Not Applicable				Direct

Note:

1) *If the EUIN is invalid/missing, the transactions shall be processed in Regular plan, and the distributor/investor shall be given 30 day period from the date of the transaction for remediation of the EUIN. In such cases, the investor to be advised to either provide a different EUIN linked to the ARN who would be engaged in servicing the investor OR switch to Direct Plan. The commission shall not be paid to the ARN holder if the Switch transaction does not happen, or fresh EUIN is not provided within 30 days. The commission may be paid if the fresh EUIN is provided by client within 30 days.

2) For SIP & STP facilities, the ARN validity shall be verified / validated at the time of registration. For instances where the registration details not available in RTA records the transaction shall be treated as lumpsum purchase for validations. Distributors must reconcile the active / inactive SIPs with RTA's at regular intervals.

3) SIPs registered under ARN of deceased to continue till end of SIP registration period or investor's request as per AMFI guidelines; No fresh transactions or SIPs to be booked under the ARN of deceased MFD post cancellation of ARN at AMFI.

4) Only Sub-distributor's ARN with valid "ARN-" values in the transaction will be considered for validation of Sub- distributor ARN for all types of transactions (lumpsum/SIP/STP).

5) If the ARN is invalid as on date of SIP / STP registration, such registration and future transactions thereunder will be processed under DIRECT plan.

6) Transactions other than the physical mode which are found to be not in order basis above matrix, will be rejected at the time of upload / submission for following reasons: To give opportunity for the intermediary / platform to rectify details before submitting transactions or to report transactions as DIRECT.

	<p>If these transactions are accepted and processed as DIRECT, the intermediary placing the transaction will not be receiving reverse feeds and hence will not be able to reconcile.</p> <p>Since the validation cannot be carried out at the time of acceptance or transactions received in physical form, the same will be done at the time of processing the transaction, and if found to be invalid, the transaction will be processed under DIRECT.</p> <p>7) Transactions received from the stock exchange platforms in Demat mode with invalid ARN shall be rejected instead of processing in Direct Plan for following reasons –</p> <p>a) Settlement of units will fail at clearing corporation due to mismatch of ISIN.</p> <p>b) If the RTA processes the transaction in DIRECT Plan, the AMC will face issues with corporate action wherein the clearing corporation will not be able to reconcile and credit the units.</p> <p>c) The distributor/broker will not be able to download the reverse feed/mail back report for the transactions reported by the respective distributor in case if we process under Direct Plan.</p> <p>The Scheme will have a common portfolio across various Plans/Options. The NAVs of the Growth Option under both plans will be different and will be declared separately.</p> <p>For detailed disclosure on default plans and options, kindly refer SAI.</p>

Illustration:

Impact of Expense Ratio on Scheme's return:

Expense ratio, normally expressed as a percentage of Average Assets under Management, is calculated by dividing the permissible expenses under the Regulations by the average net assets. To further illustrate the above in rupees terms, for the Scheme under reference, suppose an Investor invested Rs. 10,000/- (after deduction of stamp duty and transaction charges, if any) the impact of expenses charged will be as under:

Particulars	Regular Plan	Direct Plan
Amount invested at the beginning of the year (Rs.)	10,000	10,000
Returns before expenses (Rs.)	800	800
Expenses other than Distribution expenses (Rs.)	100	100
Distribution expenses (Rs.)	50	-
Returns after expenses at the end of the year (Rs.)	650	700
Returns (in %)	6.5%	7%

Note(s):

- The purpose of the above illustration is purely to explain the impact of expense ratio charged under the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments.
- It is assumed that the expenses charged are evenly distributed throughout the year.
- The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses/commission.
- Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to seek appropriate advice.

TER for the Segregated Portfolio

1. AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
2. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
3. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
4. The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Background:

In its continuing endeavor to make the existing New Fund Offer process more efficient, SEBI introduced a supplementary process of applying in New Fund Offer, viz: the "Applications Supported by Blocked Amount (ASBA)" process. Accordingly, Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009, as amended have been amended for ASBA process. The salient features of circular no. SEBI/CFD/DIL/ASBA/1/2009/30/12 dated December 30, 2009 available on SEBI website for "Additional mode of payment through Applications Supported by Blocked Amount (hereinafter referred to as "ASBA") are mentioned below for understanding the ASBA process:

- 1. Meaning of ASBA:** ASBA is an application for subscribing to a New Fund Offer (NFO), containing an authorisation to block the application money in a bank account.
- 2. Self Certified Syndicate Bank (SCSB):** SCSB is a banker to an issue registered with the SEBI which offers the facility of applying through the ASBA process. The list of SCSBs will be displayed by SEBI on its website at www.sebi.gov.in from time to time. ASBAs can be accepted only by SCSBs, whose names appear in the list of SCSBs displayed on SEBI's website. Investors maintaining their accounts in any of these Banks may approach one of the designated branches of these SCSBs for availing this facility. Further it may be noted that from time to time new banks register themselves as SCSBs who become eligible to provide these services and also the existing SCSBs designate additional branches that also provide this facility. An updated list of all the registered SCSBs, their controlling branches, contact details and details of their contact persons, a list of their designated branches which are providing such services is available on the website of SEBI at the address <http://www.sebi.gov.in>. Further these details are also available on the websites of the Stock Exchanges at <http://www.bseindia.com> and <http://www.nseindia.com>. Alternatively, investors may also contact the AMC, R&TA for information about the SCSBs or the ASBA process. These SCSBs are deemed to have entered into an arrangement with the Issuer and shall be required to offer the ASBA facility to all its account holders for all issues to which ASBA process is applicable. An SCSB shall identify its Designated Branches (DBs) at which an ASBA Applicant shall submit ASBA and shall also identify the Controlling Branch (CB), which shall act as a coordinating branch for the Registrar to the Issue, Stock Exchanges and Merchant Bankers. The SCSB, its DBs and CB shall continue to act as such, for all issues to which ASBA process is applicable. The SCSB may identify new DBs for the purpose of ASBA process and intimate details of the same to SEBI, after which SEBI will add the DB to the list of SCSBs maintained by it. The SCSB shall communicate the following details to Stock Exchanges for making it available on their respective websites. These details shall also be made available by the SCSB on its website:
 - i. Name and address of the SCSB
 - ii. Addresses of DBs and CB and other details such as telephone number, fax number and email ids.
 - iii. Name and contact details of a nodal officer at a senior level from the CB.

- 3. Eligibility of Investors:** An Investor shall be eligible to apply through ASBA process, if he/she:
 - i. is a Resident Retail Individual Investor, Non Institutional Investor, QIBs, Eligible NRIs applying on non-repatriation basis, Eligible NRIs applying on repatriation basis i.e. any investor,
 - ii. is applying through blocking of funds in a bank account with the SCSB; Such investors are hereinafter referred as „ASBA Investors%0.

ASBA Facility in Brief: Investor shall submit his / her Application through an ASBA** Application Form, either in physical or electronic mode, to the SCSB with whom the bank account of the ASBA Investor or bank account utilised by the ASBA Investor (ASBA Account) is maintained. The SCSB shall block an amount equal to the NFO application Amount in the bank account specified in the ASBA Application Form, physical or electronic, on the basis of an authorisation to this effect given by the account holder at the time of submitting the Application. The Application Amount shall remain blocked in the aforesaid ASBA Account until the Allotment in the New Fund Offer and consequent transfer of the Application Amount against the allocated Units to the Issuers account designated for this purpose, or until withdrawal/failure of the Offer or until withdrawal / rejection of the ASBA Application, as the case may be. The ASBA data shall thereafter be uploaded by the SCSB in the electronic IPO system of the Stock Exchanges. Once the Allotment is finalised, the R&TA shall send an appropriate request to the Controlling Branch of the SCSB for unblocking the relevant bank accounts and for transferring the amount allocable to the successful ASBA Applicants to the AMC account designated for this purpose. In case of withdrawal/Rejection of the Offer, the R&TA shall notify the SCSBs to unblock the blocked amount of the ASBA Applicants within one day from the day of receipt of such notification.

- 5. Obligations of the AMC:** AMC shall ensure that adequate arrangements are made by the R&TA to obtain information about all ASBAs and to treat these applications similar to non-ASBA applications while allotment of Units, as per the procedure specified in the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009.
